

CSL_SC_Broadcast_Mac_Checklist Do these steps in this order

1} 'Shutdown' the Mac system. Unplug the hub's USB-C power and Mac connections for 10 seconds. Plug in headphones. Reconnect cables, and power Mac back up.

2} 'ESI' Maya22 app:

Input at left: Hi-Z

Input slider: -8

Output slider: 0

'Mon' button at top: OFF

'Link' button at top-right: ON

3} Mac: System Preferences:

Sound: Input: Maya22 USB

Sound: Output: Maya22 USB

Displays: Arrangement Tab: Mirror Displays: Off

Displays: Display tab: all windows: Default for Display

Displays: Color tab: all windows : Show profiles this display only

Displays: Panasonic window: Underscan: appx 1/2 over

4} Ecamm Live app:

Camera Menu (greyed if not camera scene): Canon 70d and Canon SL2

Mic Menu: Maya22 USB

Output Menu: Audio Monitor: Headphones/Built-in

Output Menu: Video Monitor: Panasonic

Sound Levels Window: Maya22 USB slider: 90 (hard to read)

5} After 9:30am, Ecamm Live app:

Confirm 'Go Live', etc buttons (Restream to YT and FB)

Not? Check Ecamm Prefs: Destinations (Command+Comma)

Text on this page N/A – no longer zoom-ing:

Output Menu: Audio Monitor: Remote PC (goes to Zoom)

5} Zoom:

Start new 'Sunday' meeting AND Share screen AND Original Sound: ON

Next the Mute bottom – select the up arrow and make sure the microphone and speaker selected for both input and output is “Remote PC”

Original Sound: ON

View Menu: select Show Manage Participants AND Show Chat

Mute all participants through the Manage Participants window, AND uncheck "Allow...Unmute"

Notes:

Zoom Configuration URL: <https://zoom.us/Profile/Settings>

Scroll down to: 'Schedule Meeting'

Select: 'Mute All as they Join'

Ecamm Preferences: General:

Turn off 'Play App Sounds'
